Address: Addis Ababa, 1000, Addis Ababa, Ethiopia (Home)

ABOUT ME

Full-Stack Developer with 3+ year of hands-on experience building modular, scalable, and production-ready web applications using React, Next.js, TypeScript, Node.js, Laravel, PostgreSQL, Supabase, and Docker. Strong experience in both frontend and backend development, including responsive UI development, API integration, ERP systems, company websites, SaaS platforms, and AI automation solutions. Experienced working across internships, freelance projects, company environments, and hackathons, with a strong ability to deliver real-world software solutions.

WORK EXPERIENCE

FULL STACK DEVELOPER | SAFARICOM TALENT CLOUD | - GEBEYA INC (SAFARICOM) - 09/05/2025 - 10/2025 - ADDIS ABABA, ETHIOPIA

5-Month Intensive Development Program

- Developed and deployed an MVP using Nextjs, React, Node.js, Express, and PostgreSQL
- Built responsive user interfaces with Tailwind CSS
- Worked in Agile teams and managed tasks using Jira
- Collaborated with cross-functional teams to deliver production-ready applications
- Gained hands-on experience with modern development and deployment practices
- Won 2nd place for developing a **Fuel Finder App**

SOFTWARE DEVELOPER - ATLAS COMPUTER TECHNOLOGY - 24/08/2024 - 12/2025 - ADDIS ABABA, ETHIOPIA

Frontend Developer Intern and Contractor - Atlas Computer Technology

- Developed and maintained the frontend of a House Rent Management System using **React** and **Next.js**
- Built responsive and user-friendly interfaces
- Worked closely with the team to fix bugs and improve features
- Completed a **5-month paid internship then full-timer for several months**

FRONTEND DEVELOPER - ZAGOAL PLC - 10/01/2026 - Current - WASHINGTON DC, UNITED STATES

Freelance Frontend Developer | Ongoing

- Contributing to a large-scale project as a Frontend Developer

FULLSTACK DEVELOPER - FORMIDABLE - 02/06/2023 - 04/2025 - ADDIS ABABA, ETHIOPIA

Full Stack Developer - Formidable Company

- Developed the **Wedet App**, a tourism booking platform for Ethiopia, handling **full-stack development** (excluding design)
- Built core features including **tour listings, booking systems, and user management**
- Worked with **Next.js, Supabase, and Docker** to ensure a scalable and secure application
- Collaborated with the team to implement **production-ready solutions** and streamline booking workflows
- Focused on **digitalizing and connecting the tourism industry** through a unified platform

SOFTWARE DEVELOPERS - YAB CHEMICALS - 28/02/2025 - 11/2025 - ADDIS ABABA, ETHIOPIA

Web Developer & Operations Support - YAB Chemicals

- Developed and fully deployed the company website using **React, NextJS**

- Managed and updated website content and company details
- Supported daily operations and helped maintain team motivation
- Ensured the website remained functional and up to date

SOFTWARE DEVELOPER – AFTERQUERY – 14/03/2026 – Current – SAN FRANCISCO, UNITED STATES

Software Developer & AI Designer | AfterQuery

- Developed and maintained web-based applications, collaborated on software development projects, and designed AI-driven solutions and prompts to improve user experiences and workflow efficiency.

SOFTWARE DEVELOPER – ELISOFT SOLUTION PLC – 09/02/2026 – Current – ADDIS ABABA, ETHIOPIA

Software Developer, Elisoft Solution PLC

- Laravel & PHP - Contributed to ERP system development.
- Next.js - Developed responsive frontend interfaces for ERP modules and client projects.
- Supported the design, development, and maintenance of software solutions using various technologies

PRODUCT EXPERT – GEBEYA INC – 09/02/2026 – Current – ADDIS ABABA, ETHIOPIA

AI Ambassador | Dala AI

- Selected as one of the first AI Ambassadors, contributing to AI use case development, building innovative AI-powered solutions, and promoting AI adoption through community engagement and knowledge sharing.

WEB DEVELOPER – CODSOFT – 17/06/2023 – 07/2024 – ATLANTA, GA.

Web Development Intern at CodSoft – Built responsive websites using HTML, CSS, and JavaScript. Worked on UI design, debugging, and real-world coding projects. Gained hands-on experience with web technologies and teamwork.

ICT CLUB ADVISOR | HOPE ENTERPRISE UNIVERSITY COLLEGE – HOPE ENTERPRISE COLLEGE UNIVERSITY – 17/04/2022 – 03/2026 – ADDIS ABABA, ETHIOPIA

Current Position

- Organize technical events and workshops for 80+ students
- Mentor students in programming and software development
- Lead initiative to increase student participation in hackathons and programming competitions
- Provide guidance on career development and technical skill building
- Foster a collaborative learning environment within the ICT community

PARLIAMENT GROUP ADVISOR | HOPE UNIVERSITY | ADDIS ABABA, ETHIOPIA – HOPE ENTERPRISE COLLEGE UNIVERSITY – 10/04/2022 – 04/2026 – ADDIS ABABA, ETHIOPIA

LANGUAGE SKILLS

Mother tongue(s): AMHARIC

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH			B2		C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Frontend

React, Next.js, Tailwind CSS

Backend

Node.js, Express.js, NestJS, Laravel, Spring Boot, Django

Databases & Backend Services

PostgreSQL, MySQL, MongoDB, Vector Databases, Supabase

DevOps & Deployment | Testing

Docker, CI/CD, VPS, cPanel,Jest | Jenkins

AI & Automation

RAG.n8n

PROJECTS

Fuel Finder (Full Stack Application)

I built responsive web interfaces using React.js to deliver an optimal user experience, while developing a robust backend API with Node.js and Express. I implemented real-time data processing and user authentication to enhance functionality and security. Additionally, I deployed the application using modern DevOps practices, ensuring scalability and reliability in production environments.

Senior Project - Addis Ababa House Rental Agreement Management System

This is a full-stack system that has been developed to digitize and modernize the house rental agreement management process in Addis Ababa City. The project replaces the existing manual system with a secure and efficient digital solution

for managing house agreements, tenant records, and related administrative workflows. The application was developed using React for the frontend, Node.js for the backend, Docker for containerization, and Zod for validation. The system has already been presented in one of the city's sub-cities as a potential real-world implementation and is designed to improve transparency, efficiency, and data management in rental agreement processes.

House Rental Management System

House Rental Management System

A web-based system developed for **Amhara Housing Corporation** and **Hibret Bank** to manage rented houses efficiently. I worked on this project as a **Frontend Developer** at **Atlas Computer Technology**, contributing from the **UI/UX design phase to full implementation**. The application was built using **React and Next.js**, styled with **shadcn/ui**, and included **Zod validation** for form handling and **Zustand** for state management. The system is used to manage rental properties, tenants, payments, and other housing operations across multiple workflows.

Yab Chemicals Company Official Website

YAB Chemical Website

YAB Chemicals is a company with a strong global network and a commitment to quality, specializing in importing and supplying a wide range of trusted chemical products for industries and businesses. Their services range from laboratory essentials to large-scale industrial chemicals, with a focus on reliable sourcing, timely delivery, and expert guidance. I developed a **fully modern, responsive, and production-ready website** for YAB Chemicals using **React**, handling the complete **UI/UX design and frontend implementation**. The website was built to **digitize the company's advertising and online presence**, improve brand visibility, and provide a professional platform for showcasing products and services.

Wedet App

Wedet App – Tourism Booking Platform

Wedet App is a full-stack tourism platform designed to connect the Ethiopian tourism industry into one unified system, enabling users to **discover destinations, book tours, and make travel arrangements online**. I worked on the **full-stack development** of the application (excluding UI/UX design), building core features such as tour listings, booking systems, and user management. The platform was developed using **Next.js, Supabase, and Docker**, ensuring scalability, secure data handling, and efficient deployment. The goal of the project is to simplify tour booking and promote tourism across different regions of Ethiopia through digital transformation.

CURRENT

Zagoal PLC SaaS Project

Worked as a Frontend Developer at Zagoal PLC, contributing to the development of a large-scale internal project aimed at supporting and improving internal company operations.

Link <https://www.zagoal.com>

10/05/2026 – CURRENT

PTGR Token Platform

Developed a secure token-holder platform for the **PTGR Hackathon** hosted in **Addis Ababa**, enabling investor onboarding and identity verification for users across **40+ countries**. Built the frontend with **Next.js, Better Auth, Zustand**, and **Zod**, and developed the backend using **NestJS**. Integrated **Didit** for KYC/identity verification, ensuring secure authentication and a seamless onboarding experience
