ABOUT ME

Software Developer with hands-on experience building modular and scalable web applications. Experienced with **microservices**, **ERP systems**, and **AI automation** solutions across different company environments. Participated in **hackathons** and held **leadership** roles during university.

WORK EXPERIENCE

Gebeya Inc (Safaricom) – Addis Ababa, Ethiopia

Full Stack Developer | Safaricom Talent Cloud | Addis Ababa, Ethiopia

3-Month Intensive Development Program

- Developed and deployed an MVP using React, Node.js, Express, and PostgreSQL
- Built responsive user interfaces with Tailwind CSS
- Worked in Agile teams and managed tasks using Jira
- Collaborated with cross-functional teams to deliver production-ready applications
- Gained hands-on experience with modern development and deployment practices
- Won 2nd place for developing a **Fuel Finder App**

Hope Enterprise College University – Addis Ababa, Ethiopia

Parliament Group Advisor | Hope University | Addis Ababa, Ethiopia

ICT Representative

- Represented student interests in technology and ICT-related discussions
- Facilitated communication between students and administration

CodSoft – Atlanta, GA.

Web developer

Web Development Intern at CodSoft – Built responsive websites using HTML, CSS, and JavaScript. Worked on UI design, debugging, and real-world coding projects. Gained hands-on experience with web technologies and teamwork.

Atlas Computer Technology – Addis Ababa, Ethiopia

Software Developer

Frontend Developer Intern – Atlas Computer Technology

- Developed and maintained the frontend of a House Rent Management System using **React** and **Next.js**
- Built responsive and user-friendly interfaces
- Worked closely with the team to fix bugs and improve features
- Completed a **5-month paid internship**

 **Formidable** – Addis Ababa, Ethiopia

Fullstack Developer

Full Stack Developer – Formidable Company (4 months)

- Developed the **Wedet App**, a tourism booking platform for Ethiopia, handling **full-stack development** (excluding design)
- Built core features including **tour listings, booking systems, and user management**
- Worked with **Next.js, Supabase, and Docker** to ensure a scalable and secure application
- Collaborated with the team to implement **production-ready solutions** and streamline booking workflows
- Focused on **digitalizing and connecting the tourism industry** through a unified platform

 **Hope Enterprise College University** – Addis Ababa, Ethiopia

ICT Club Advisor | Hope Enterprise University College | Addis Ababa, Ethiopia

[Current]

Current Position

- Organize technical events and workshops for 30+ students
- Mentor students in programming and software development
- Lead initiative to increase student participation in hackathons and programming competitions
- Provide guidance on career development and technical skill building
- Foster a collaborative learning environment within the ICT community

 **Yab Chemicals** – Addis Ababa, Ethiopia

Software developers

[Current]

Web Developer & Operations Support – YAB Chemicals

- Developed and fully deployed the company website using **React**
- Managed and updated website content and company details
- Supported daily operations and helped maintain team motivation
- Ensured the website remained functional and up to date

 **Elisoft Solution PLC** – Addis Ababa, Ethiopia

Software developer

Software Developer, Elisoft Solution PLC

- Contributed to ERP system development using Laravel and PHP
- Supported the design, development, and maintenance of software solutions using various technologies

 **Zagoal PLC** – Washington DC, United States

Frontend Developer

Freelance Frontend Developer | Ongoing

- Contributing to a large-scale project as a Frontend Developer

EDUCATION AND TRAINING

Bachelor's Degree in Computer Science

Hope Enterprise University College [09/05/2022 – 11/03/2026]

City: Addis Ababa | Country: Ethiopia | Website: <https://www.heuc.edu.et/>

Udacity: Programming Fundamentals, AI Fundamentals, Android Development

Udacity

Website: <https://www.udacity.com/>

Responsive Web Design

FreeCodeCamp

Website: <https://www.freecodecamp.org/>

ICT Club Hackathon Competition

Hope Enterprise University Collage

City: Addis Ababa | Country: Ethiopia | Website: heuc.edu.et | Field(s) of study: Computer Science

AWS Ai Trainee

AWS

City: Addis Ababa | Country: Ethiopia | Website: <https://signin.aws.amazon.com> | Field(s) of study: Information and Communication Technologies

LANGUAGE SKILLS

Mother tongue(s): Amharic

Other language(s):

English

WRITING C1 SPOKEN PRODUCTION B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Languages

JavaScript, TypeScript, PHP, Python, Java, SQL

Frontend

React, Next.js, Tailwind CSS

Backend

Node.js, Express.js, NestJS, Laravel, Spring Boot, Django

Databases & Backend Services

PostgreSQL, MySQL, MongoDB, Vector Databases, Supabase

DevOps & Deployment | Testing

Docker, CI/CD, VPS, cPanel, Jest

AI & Automation

AI Automation, RAG

PROJECTS

Fuel Finder (Full Stack Application) I built responsive web interfaces using React.js to deliver an optimal user experience, while developing a robust backend API with Node.js and Express. I implemented real-time data processing and user authentication to enhance functionality and security. Additionally, I deployed the application using modern DevOps practices, ensuring scalability and reliability in production environments.

[Current]

Senior Project - Addis Ababa House Rental Agreement Management System This is a full-stack system that has been developed to digitize and modernize the house rental agreement management process in Addis Ababa City. The project replaces the existing manual system with a secure and efficient digital solution for managing house agreements, tenant records, and related administrative workflows. The application was developed using React for the frontend, Node.js for the backend, Docker for containerization, and Zod for validation. The system has already been presented in one of the city's sub-cities as a potential real-world implementation and is designed to improve transparency, efficiency, and data management in rental agreement processes.

Link: <https://aahrams.onrender.com/>

House Rental Management System A web-based system developed for **Amhara Housing Corporation** and **Hibret Bank** to manage rented houses efficiently. I worked on this project as a **Frontend Developer** at **Atlas Computer Technology**, contributing from the **UI/UX design phase to full implementation**. The application was built using **React and Next.js**, styled with **shadcn/ui**, and included **Zod validation** for form handling and **Zustand for state management**. The system is used to manage rental properties, tenants, payments, and other housing operations across multiple workflows.

Yab Chemicals Company Official Website YAB Chemical Website YAB Chemicals is a company with a strong global network and a commitment to quality, specializing in importing and supplying a wide range of trusted chemical products for industries and businesses. Their services range from laboratory essentials to large-scale industrial chemicals, with a focus on reliable sourcing, timely delivery, and expert guidance. I developed a **fully modern, responsive, and production-ready website** for YAB Chemicals using **React**, handling the complete **UI/UX design and frontend implementation**. The website was built to **digitize the company's advertising and online presence**, improve brand visibility, and provide a professional platform for showcasing products and services. Write here the description...

Wedet App Wedet App – **Tourism Booking Platform** Wedet App is a full-stack tourism platform designed to connect the Ethiopian tourism industry into one unified system, enabling users to **discover destinations, book tours, and make travel arrangements online**. I worked on the **full-stack development** of the application (excluding UI/UX design), building core features such as tour listings, booking systems, and user management. The platform was developed using **Next.js, Supabase, and Docker**, ensuring scalability, secure data handling, and efficient deployment. The goal of the project is to simplify tour booking and promote tourism across different regions of Ethiopia through digital transformation. Write here the description...
